

# Art and Science of Counselling

## Basic Program

St. John's Counselling Service  
Spring 2011 Course

*Empowering the Human Spirit Towards Greater Awareness for Growth and Happiness*

*Suite 7D 7/F On Hing Building - 1-9 On Hing Terrace - Central Hong Kong  
[www.sjcshk.com](http://www.sjcshk.com)*

## Introduction

In 1977 *St. John's Cathedral* enacted upon a commitment to have both a spiritual and counselling presence in Hong Kong, hence the birth of *St. John's Counselling Service (SJCS)*. Subsequently in 2007 St. John's Counselling Service embraced *Positive Psychology* as the key element in our vision to provide a safe, confidential, affordable, professional, and caring environment for counselling and therapeutic services.

Today *SJCS* employs over 24 counsellors who are psychologists and clinical social workers providing counselling for children, teens and adults with a mission to *enhance growth and happiness* for all our clients. Our services include on-site school counselling for children and teens at various international colleges, employee assistance programs (EAP) for Hong Kong's companies, individual - couple - family counselling, psychometric testing, life and career coaching, crisis response team for natural disasters and human tragedy, internship programs for master and doctoral psychology students, detox - substance abuse rehab services with our partners in the U.S. and Thailand, and counselling training programs for mental health professionals, pastoral counsellors, teachers, consultants, working adults, students, human resource managers, nurses, general healthcare practitioners, and others interested in counselling and psychology.

## Our Training History

In 1992 SJCS delivered a program entitled *Skilled Helping Relationships (SHR)* for adults who wanted to learn more about themselves and how to better manage relationships with others. The course was designed for adults from all walks of life with a total of 15 sessions divided into two parts. Part 1 of the course focused primarily on raising awareness of the self; Part 2 centred on improving intellectual and behavioral awareness when interacting as a "helping professional."

In 2004 SJCS launched the *Relationship Skills Course (RSC)*, formerly known as the Skilled Helping Relationships course, with an additional focus on small group work. The program was designed to provide participants with a better understanding of themselves, and how to effectively communicate in personal and professional settings. Like the SHR program, the RSC program had two parts, and a weekend retreat and practicum.

Beginning in 2007, we offered a pre-marital program entitled the *Happy Marriage Program (HMP)* for all couples irrespective of their faith and place of marriage. The HMP has two parts: *Happy Life vs Good Life* (the key ingredients to an enduring, happy marriage) and *Who Are You Again?* (better understanding of the "I" and "we" personalities in a marriage). Concurrently in 2007 we started to provide training courses and workshops to the general public and various international colleges on such topics as internet addiction, eating disorders, substance abuse, self harm and self injury, grief, depression and mood disorders, ADHD, children in divorcing families and other relevant topics.

## The Training

*The Art and Science of Counselling* is designed with two tracks: Basic Program and Advanced Course. The premise for both tracks is to provide participants with a greater understanding of the recent developments in counselling from two key aspects: i) how the human brain, mind and personality influences our thoughts, feelings and behaviors, and ii) how counselling and therapy has improved its effectiveness and increased its social acceptance by way of positive psychology and cognitive behavioral therapy (CBT).

Regarding the topics in the **Basic Program**, participants will be able to acquire a basic understanding of the *science component* of counselling: the structure and functions of the brain. The training material will be entertaining and easy to understand, and equally as well, applicable in almost all counselling and therapeutic settings. A main focus will be how the human brain instinctually and socially seeks to balance the *need to achieve* and the *need to connect*, and why those two areas are important when assessing and working with a client in counselling. Hence, the participants will have a greater understanding of how the human brain contributes to both mental disorders and mental health.

The second part of the program focuses on techniques and application of positive psychology and cognitive behavioral therapy (CBT). Participants will learn the five basic steps in a counselling - therapy setting and how CBT and Positive Psychology can be applied in each step. With an effective counselling model highlighted step by step, participants will immediately increase their skills and abilities on how to integrate both an ongoing assessment experience as well as a learning and growth process for all types of clients. Thus, whereas Part 1 of the program establishes a better understanding of the neuro-sciences of the human brain, Part 2 focuses on how to continually develop change and growth goals for their clients with CBT and Positive Psychology.

Albert Schweitzer once said: "Each patient carries his own doctor inside him . . . We are at our best when we give the doctor who resides within each patient a chance to go to work." Our **Basic Program's** ultimate goal is helping our participants better understand how to *collaborate* with clients in counselling that allows that client to be more mindful of the self, what options exist in life and the consequences of those options. Once the depth of awareness of the self has been experienced by the client and counsellor, it is then we can continue to collaborate with our clients in reducing their anguish with the self and others (the healing) as well as how to build and sustain happy relationships in their "I" and "We" worlds (the learning). We look forward to collaborating with you with the return of this popular program in Hong Kong.

## Administrative Details

### Intended Audience:

*Professional participants:* pastoral counsellors, school counsellors, practicing counsellors, academics, psychologists, psychiatrists, social workers, nurses, clergy, teachers and organization development specialists/trainers.

*Non-professional participants:* students in social work, psychology and healthcare programs; adults considering a career in counselling, volunteers at social agencies, parents and adults who are interested in improving their personal and professional relationship skills.

### Medium of Instruction:

*English (presentations and course material).*

### Course Material:

*Textbook: What You Can Change . . . and What You Can't* by Dr. Martin E. P. Seligman, Ph.D.

*Textbook: Client's Guide to Cognitive-Behavioral Therapy* by Aldo Pucci

*Workbook: Art and Science Counselling Workbook* by Dr. Mark L. Gandolfi, Ph.D.

*Handouts:* On a session by session basis relating to the topics explored.

*Case Studies:* On a session by session basis relating to the topics explored.

### Course Dates:

September 24, 2011 - November 19, 2011 (8 sessions - 24 contact hours)

### Meeting Time:

Saturday 10:00 am - 1:00 pm

Note: there will be a 15 minute break for each session, participants may bring food and drink.

### Meeting Place:

*St. John's Cathedral:* 4 - 8 Garden Road, Central Hong Kong

### Attendance:

*Certificate of Achievement:* Participants who attend over 80% of all scheduled sessions shall receive a Certificate of Achievement.

Note: *Art and Science of Counselling* course is currently being assessed by various international professional bodies for award and recognition. Once such a recognition has been achieved, we will ensure all participants receive the distinction.

### Make-up Sessions:

*Contracted:* Those participants who missed a session due to work - professional, illness and/or other personal reasons may request for a 1:1 make-up session. The session shall last for 1 hour.

## Presentation Details

### Blended Learning:

There will be a balance of both theory and practical application in all scheduled sessions whereby the participants will be exposed to various learning scenarios in the **Basic Program** and the Advanced Course. All sessions will have a case study and ready-to-use techniques. Some sessions may include small group work and possible guest speakers. In short, each session will have a balance of theory (*what* is it), application (*how* to use it) and case study (*where* can it be applied).

Participants may bring laptop computers but is not a requirement for enrollment and/or participation for note taking. Video recording is not permitted.

### Facilitators:

*Lead Facilitator:* SJCS Executive Director who has been a clinical psychologist and health care executive for over 29 years in the U.S. and Asia.

*Co-Facilitator:* each session may include a SJCS counselling/clinical psychologist and/or a clinical social worker will co-facilitate and present a case study.

- Understanding how our brains evolved from the elephant (surviving) to the rider (relating)
- Identifying the four brain activities that ensure relating with the self and others
- Discussing why men *achieve now - connect later* and women *connect now - achieve later*
- Clarifying the significance of “I” and “We” hats for healthy and sustaining relationships
- Case Study: Befriending, connecting and the female brain

### Session 4A - Thinking About What You Feel (Emotions)

- Understanding how emotions are experienced differently for male and females
- Identifying the purpose of emotions and how perception influences “what we think we feel”
- Discussing how parenting and education shape the brain and create positive/negative moods
- Clarifying the basic types of emotions: single and compound types
- Case study: Worry, fear and anxiousness in the male brain

### Session 4B - Being Mindful About Your Feelings (Reflecting not Reacting)

- Understanding the five basic feelings of the brain
- Identifying the negative and positive consequences of each brain feeling
- Discussing why men think then feel and females feel then think
- Clarifying the difference between disorder and trait issues with depression
- Case study: Grief, grieving and mourning in the female brain

## Part 2: The Art of Positive Psychology Counselling

### Session 1A - Understanding Positive Psychology (Theory)

- Understanding the major elements and values of positive psychology
- Identifying the differences between traditional psychology and positive psychology
- Discussing the role 6 core traits and 24 signature strengths play in positive psychology counselling
- Clarifying what to look for in each stage of human development to ensure happiness and health
- Case study: Male brain reaction to unemployment

*I am afraid to listen, for by listening I might understand, and be changed by that understanding.*

**Carl Rogers**

### Session 1B - Building a Positive Psychology Counselling Model (Application)

- Understanding the differences between advising, intervention, counselling and therapy
- Identifying the five key stages counsellors manage in effective counselling and/or therapy
- Discussing the balance of *healing the angst* and *learning happiness* in counselling
- Clarifying the various levels and types of change within a counselling context
- Case study: Substance abuse and female brain

### Session 2 - Highlighting the Integration and Use of CBT in Positive Psychology (Techniques)

- Understanding the key elements of cognitive-behavioral therapy (CBT)
- Identifying challenges and issues when assessing with CBT paradigm
- Discussing how CBT works with mood disorders and anger management
- Exploring the various CBT forms and techniques to use in counselling
- Case study: CBT and couples counselling

### Session 3A - Surviving in the Social World (Unpleasantness)

- Understanding the impact changes in the workplace and household have on happiness
- Identifying the biological and environmental elements of unpleasant emotions
- Discussing the positive and negative roles of anger, anxiety and depression
- Clarifying the what we can change and cannot change with unpleasant emotions
- Case study: Infidelity-divorce and the adult male/female brain

*We may define therapy as a search for value.*

**Abraham Maslow**

### Session 3B - Connecting in the Optimistic Life (Relationships)

- Understanding how social intelligence and emotional intelligence impacts happiness
- Identifying the various models of marriage and love
- Discussing the three key elements of happy life: trust, nurturing and intimacy
- Clarifying the four key stages in conflict and how to resolve conflict in each stage
- Case study: Dating-marriage (passion, romance, harmony) and the adult male/female brain

### Session 4A - Thinking About What You Can and Cannot Change (Transformation)

- Understanding what are the eleven barriers to change in counselling
- Identifying the vital activities in the thinking and doing phases of change
- Discussing the various models of change in and out of positive psychology
- Clarifying the client's *feeling and thinking responses* to each stage of change

### Session 4B - Entering Into an Optimistic Mindset (Optimism)

- Understanding the world of the pessimistic and optimistic client
- Identifying the steps in overcoming the happiness trap, pessimism and negative self-talk
- Discussing how to develop values and goals to ensure congruence between the real and ideal self
- Clarifying the key ingredients of an optimistic mindset: perception, language and action
- Case Study: How male and female adult brains change over adulthood

## The Art and Science of Counselling Basic Program Registration Form
